

## Warrington School Goals 2009

### School Goals

1. Boys literacy testing indicates they are behind that of the girls - Nathan  
Q:Is the testing skewed towards girls success?  
Q:Are our boys below national standards or are our girls high achievers?  
Q:What strategies are used to raise boys literacy rates?
2. Science - Nathan
3. PE/Health - Wendy/Janine

### Teacher Goals

#### Nathan

Manage the school physical developments with the SPG and grounds development  
Work on Science curriculum and integrate into the classroom programme.  
Development of skills in using Open Office Applications.  
Marae visit

#### Trisha

Enviro Ed - strengthening community/whole school involvement , ownership, direction, vision.  
Computer use more effectively in the classroom and within curriculum.  
Strengthen Maths Numeracy project within my teaching.  
EE Vision / review (what's our overview, re-look at our Blg picture/ what's the WWW really mean for us? Looking at this with the children too... perhaps this could be renewed again and made into a school 'care code'??).Continue Virtues Ed focus (perhaps have time to discuss this amongst staff)

#### Wendy

To have a successful spelling programme and strategies in place to better equip the children to move on confidently to the "Phonetic stage."  
This is a \*big\* goal forme as I have a lovely group of beautiful boys in the class. I am doing a Phonological Awareness in the Junior Classroom In service Course next month and know this will be very beneficial. I am also looking online and off line to support my interest.  
Find more time to do P.E within the day, we are so very busy with numeracy and literacy that this is an area that sometimes is neglected and I am very conscious of this.  
Management Unit Goal:  
Doing a P.E continuation survey from eight years ago on getting rural children actively involved in sport within their means.  
4. Professional development update e.g. readings, courses etc for numeracy.

#### Brenda

Make sure Numeracy programme is running smoothly and that resources are easily accessible.  
Incorporate Maori language in classroom more frequently.  
Build up knowledge skills in teaching music.

#### Janine

To improve my reading programme, the activities and specific learning outcomes for children. have registered for a course at college of educ which looks at reading programmes.  
Continue building up computer skills.  
To read more widely re things scientific, and incorporate science opportunities more into my teaching.  
School: Evaluate current spelling programme - Do teachers find it easy to use? Does it meet children's needs? - to see if it has a future in our school, and continue to look for alternatives.  
Increase Science and Physical education opportunities.
